

2-way cartridge valves, directional functions

Type LC (cartridge valves)
Type LFA (control cover)

### **RE 21010**

Edition: 2017-05 Replaces: 2014-09

- ▶ Standard series
- ▶ Size 16 ... 160
- Component series 2X; 6X; 7X
- ► Maximum operating pressure 420 bar
- ► Maximum flow 25,000 I/min

### **Features**

- ▶ Valve poppet with or without damping nose
- 2 area ratios
- ▶ 6 different cracking pressures
- ▶ 4 stroke limitations
- ► Control cover with integrated seat valve
- ► Control cover with integrated shuttle valve
- ► Control cover for set-up of directional spool valves with or without installed shuttle valve

## Ordering code: Control cover type LFA...

| 01  | 02 | 03 |   | 04 |   | 05 | 06 | 07 | 80 | 09 | 10 | 11 | 12 | 13 | 14 | 15 |
|-----|----|----|---|----|---|----|----|----|----|----|----|----|----|----|----|----|
| LFA |    |    | - |    | / |    |    |    |    |    |    |    |    |    |    |    |

#### **Corrosion resistance**

| 13 | None   | no code |
|----|--|---------|
|    | Improved corrosion protection (240 h salt spray test according to EN ISO 9227) | J3      |

#### Seal material

| 14 | NBR seals  | no code |
|----|--|---------|
|    | FKM seals  | V       |
|    | Observe compatibility of seals with hydraulic fluid used. (Other seals upon request) |         |

#### Connections, mounting and plug screws

| 15 | Mounting screws, metric; connections inch thread | no code |
|----|--|---------|
|    | Mounting screws UNC; connections UNF             | /12     |

### Motice:

Additional functions with special numbers see from page 97.

| Orifice    | symbol                    | Symbol in o   | rdering code |  |  |
|------------|---------------------------|---|--------------|--|--|
| A**        |                           | This orifice is designed as screw-type orifice. If an orifice installed, the respective code letter with the orifice Ø be entered in the type designation.  Example: A12 = orifice with Ø1.2 mm in channel A. |              |  |  |
| Ø1.2       | $\stackrel{\smile}{\sim}$ |   | 4            | This orifice is designed as bore. No specifications are made in the type designation. (Orifice $\varnothing$ in mm)                                    |  |
| <b>Z12</b> | 8                         |   | 4            | This orifice is designed as screw-type orifice. This is a standard orifice. No specifications are made in the type designation. (Orifice Ø in 1/10 mm) |  |

#### Pilot control valve (separate order)

|        | Control cover             |        | Pilot control valve                                      |
|--------|---------------------------|--------|--|
| Size   | Design                    | Size   | Description  |
| 16 50  | WE., WEM., WECA, GW., KW. | 6      | 4/3-, 4/2-, 3/2-directional spool valve, direct operated |
| 63 100 | WE., WEM., WECA, GW., KW. | 10     | (subplate mounting)                                      |
| 125    | WE., WEMA, KW.            | 10, 16 | 2/2-, 3/2-, 4/2 directional seat valve, direct operated  |
| 160    | WE.                       | 25     | (subplate mounting)                                      |

## Notice:

- ▶ By combination of a 2-way cartridge valve with a pilot control valve, various valve functions can be realized. Possible pilot control valves according to ISO 4401 see selection table above.
- Mounting screws for pilot control valves are not included in the scope of delivery.

### **Technical data**

## Important information on hydraulic fluids:

- ► For further information and data on the use of other hydraulic fluids, please refer to the data sheets above or contact us.
- ► There may be limitations regarding the technical valve data (temperature, pressure range, life cycle, maintenance intervals, etc.).

### ► Flame-resistant – containing water:

- Life cycle as compared to operation with mineral oil HL, HLP 30  $\dots$  100%
- Maximum hydraulic fluid temperature 60 °C
- ▶ Bio-degradable and flame-resistant: If this hydraulic fluid is used, small amounts of dissolved zinc may get into the hydraulic system.
- 1) The cleanliness classes specified for the components must be adhered to in hydraulic systems. Effective filtration prevents faults and simultaneously increases the life cycle of the components.
  - Available filters can be found at www.boschrexroth.com/filter.
- Not recommended for corrosion-protected version "J3" (contains zinc)
