Versatility and Power for Multiple Jobs

With interchangeable insertion tubes and light sources, an 8 inch touch screen, and advanced imaging features, the IPLEX GX/GT videoscope delivers an optimal balance of versatility, imaging capabilities, and ease of use.

— Get the Most Out of Your Videoscope —

Powerful Features at Your Fingertips

- Easy-to-use touch screen and hot key controls
- Position the screen where it's comfortable for you
- Bright and clear images with smart video

One Tool for Many Jobs

- Change between white, ultraviolet, and infrared light sources
- Interchangeable scopes in a variety of diameters and lengths
 - Tough enough to work in harsh environments

Powerful Features at Your Fingertips

Innovative Imaging Improves Inspections

Bright Illumination

The LED light source of IPLEX GX/GT is 30% brighter than its predecessor (IPLEX RX/RT).

Crisp images

The videoscope uses a new noise reduction algorithm to make it easier to locate problems and defects in dark areas.

Smooth 60 fps video

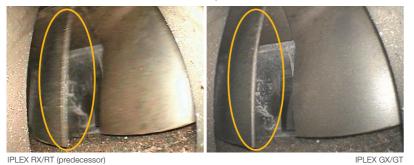

Capture smooth videos with the videoscope's high frame rate. If you are recording a moving object, you can obtain clear videos with no stutter.

Smooth 60 fps video

Smart Video Recording

Record still images and video simultaneously

With the push of a button, you can capture still images while recording a video without interruption.

Bookmark

Add bookmarks to save time and quickly find critical moments during video reviews.

Constant video*

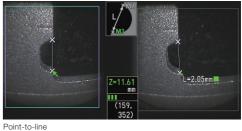

Never lose critical inspection recordings. The videoscope automatically records the last 30 minutes of your inspection even if you forget to press the record button. *Available only with IPLEX GX and requires optional microSDHC card

The large monitor leaves plenty of room to display both your inspection image and quick control buttons. Most functions can be controlled using the touch screen, including the articulation. If you want to use the full screen to view images, the hot keys on the controller give you control over the most important functions.

Powerful Measurement at Your Fingertips

The videoscope is equipped with scalar measurement as a standard feature, enabling you to size objects using a reference defect. For more advanced functionality, upgrade to the stereo measurement option to size objects using precise three-dimensional coordinates.

Visit our website fo more information.

Area/Lines

One Tool for Many Jobs

Interchangeable Scopes and Light Sources. Modular Components Enable You to Adapt the Videoscope to Your Inspection Tasks

Scopes are available in 4 mm and 6 mm diameters with lengths up to10 meters (32 feet). Interchangeable illumination modules also allow you to change between White LED, UV, or IR.

Scope unit

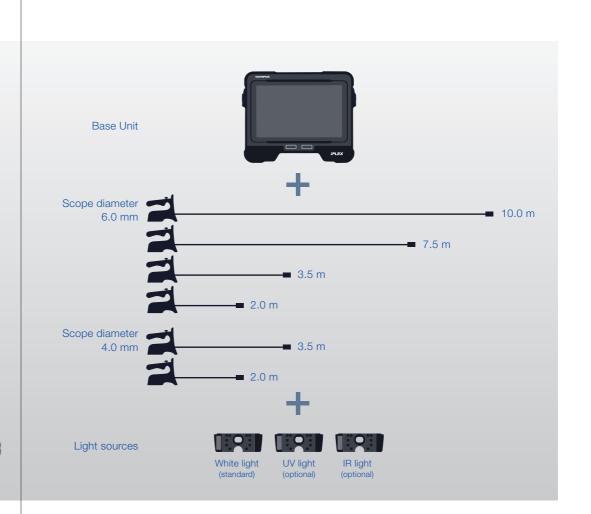

- · Scope diameter 6.0 mm: length 2.0 / 3.5 / 7.5 / 10 m
- · Scope diameter 4.0 mm: length 2.0 / 3.5 m

Liaht sources

- · White light: standard inspections
- · Ultraviolet (UV): detect hairline cracks, lubricants
- · Infrared (IR): view objects in dark areas
- The scopes and illumination modules can be changed on-site quickly and easily, reducing downtime.

White light

Stream Inspection limages for Quick Decision Making

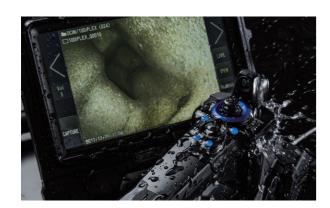

Using the recommended USB wireless LAN adaptor, images can be shared with colleagues using smartphones or tablets during the inspection. This helps make it easy to diagnose problems with the assistance of other inspectors.

The Olympus IPLEX Image Share app is available on the App Store for compatible iOS devices.

See clearly in Oily Environments

The grooves on the oil clearing tip adaptor uses capillary action to draw oil away from the lens, keeping your images clear and visible so that you don't have to stop your inspection to wipe oil off of the scope's lens.

Tested Tough

Dust

The videoscope is designed to meet IP65 standards for dust and water resistance and built to pass U.S. Department of Defense testing (MIL-STD) for protection against:

- Drops of up to • High humidity
- 1.2 meters (4 feet) Salt fog
- Vibration Freezing rain
- Blowing rain · Electromagnetic environments
 - · Explosive atmospheres

Visit our website for more information.

Accessories

Carrying Case

The hard-walled carry case is small enough to fit in the overhead bin of most airplanes, while protecting the videoscope against the rigors of travel.

Scope Case (optiona MAJ-2339

Lithium-ion Battery

The battery provides up to 150 minutes of operation.

Rigid Sleeve Sets (optional)

MAJ-1253 (for 6.0 mm) MAJ-1737 (for 4.0 mm)

Sets are available for 6 mm and 4 mm scopes. Each set comes with three rigid sleeves, measuring 250 mm, 340 mm, and 450 mm in length.

Optical Adaptors (optional)

A variety of optical adaptors for the scope enable you to change the angle, direction, and depth of view.

Guide Tube

(optional) MAJ-2341 (for 7.5 m) MAJ-2342 (for 10.0 m)
